

Abdul Azeem Hashmi

AI and Backend Engineer | Full Stack Web Developer

[Portfolio](#) | [GitHub](#) | abdulazeem7982@gmail.com | Islamabad, Pakistan

SUMMARY

AI and Backend Engineer with hands on experience building autonomous AI agents, LLM powered applications, and full stack web platforms. Skilled in designing agentic systems, scalable APIs, and clean database architectures, with a strong focus on writing reliable, production style software.

EXPERIENCE

AI Intern, UAV Dependability Research Lab

June 2026 to August 2026

Researched and engineered AI logic models for autonomous UAV systems. Ran dependability evaluations, optimized waypoint routes, and carried out rule compliance testing for mission planning software.

Software Engineering Intern, CODOC (PVT) LTD

July 2026 to August 2026

Architected and implemented scalable software solutions, optimized full stack application performance, and collaborated with the team on modern software engineering workflows.

EDUCATION

BS Artificial Intelligence, FAST NUCES, Islamabad Campus

2024 to Present

PROJECTS

Autonomous Digital Employee | [GitHub Repository](#) | [Live Demo](#)

An AI powered full stack workstation that lets users delegate complex tasks to an autonomous digital agent, with real time database logging and Google Gemini as the primary integration. Built with Next.js, FastAPI, LangChain, Gemini API, and Supabase.

Awaaz Pakistan | [GitHub Repository](#) | [Live Demo](#)

An advocacy and petition platform that empowers professionals with AI generated appeals, multi lingual voice and document inputs, and automated sign on workflows. Built with Next.js, AI, Tailwind CSS, TypeScript, and Vercel.

README AI Enhancer | [GitHub Repository](#) | [Live Demo](#)

An AI powered documentation platform that uses Google Gemini to analyze README weaknesses, detect missing technical sections, and generate polished rewrites. Built with Next.js, Gemini API, Tailwind CSS, and TypeScript.

AI Resume Analyzer | [GitHub Repository](#) | [Live Demo](#)

An intelligent web application that detects resume weaknesses, enhances formatting and content using Gemini, and provides download options in PDF and DOCX format. Built with TypeScript, Tailwind CSS, Python, Flask, and the Gemini API.

Agentic UAV Mission Planner | [GitHub Repository](#)

An end to end mission planning simulator that processes natural language requests, generates optimized waypoint routes, and enforces multi rule airspace compliance. Built with Python, Streamlit, Google Gemini, Folium, and SQLite.

SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL

AI and Agents: Gemini API, OpenAI API, LangChain, LangGraph, Streamlit, Hugging Face

Frameworks and UI: Next.js, React, FastAPI, Flask, Tailwind CSS, Framer Motion

Databases and Cloud: Supabase, SQLite, MongoDB, MySQL, Vercel, Docker

Tools: Git, GitHub, Postman, VS Code
