

Abdul Azeem Hashmi

AI and Backend Engineer | Full Stack Web Developer

[Portfolio](#) | [GitHub](#) | abdulazeem7982@gmail.com | [+92 303 9720693](tel:+923039720693) | Rawalpindi, Pakistan

SUMMARY

AI and Backend Engineer pursuing a BS in Artificial Intelligence at FAST NUCES, Islamabad. Focused on building autonomous AI agents, LLM powered applications, and full stack web experiences that emphasize performance and modern design, with hands on experience across agentic systems, scalable APIs, and clean database architectures.

EXPERIENCE

AI Intern, UAV Dependability Research Lab

June 2026 to August 2026

Researched and engineered AI logic models for autonomous UAV systems. Ran dependability evaluations, optimized waypoint routes, and carried out rule compliance testing for mission planning software.

Software Engineering Intern, CODOC (PVT) LTD

July 2026 to August 2026

Architected and implemented scalable software solutions, optimized full stack application performance, and collaborated with the team on modern software engineering workflows.

EDUCATION

BS Artificial Intelligence, FAST NUCES, Islamabad Campus

2024 to Present

PROJECTS

Pak University Advisor | [GitHub Repository](#) | [Live Demo](#)

A bilingual web application that helps Pakistani students find the best university based on budget, location, and degree requirements. Built with TypeScript, Next.js, React, and Tailwind CSS.

HEC ODL Application Orchestrator | [GitHub Repository](#) | [Live Demo](#)

An automated Open and Distance Learning application processing system for HEC, built with RAG, LangChain, and a multi AI failover architecture. Built with TypeScript, LangChain, RAG, and Next.js.

Agentic UAV Mission Planner | [GitHub Repository](#) | [Live Demo](#)

An AI powered UAV mission planning system that converts natural language commands into validated flight plans with safety checks and export options. Built with Python, AI Agents, Gemini API, and LangChain.

Developer Portfolio | [GitHub Repository](#) | [Live Demo](#)

An interactive portfolio showcase featuring projects, skills, and contact details with fluid animations and responsive styling. Built with TypeScript, Next.js, React, and Tailwind CSS.

SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL, HTML5, CSS3

AI and Agents: Gemini API, LangChain, RAG Architectures, Streamlit, Hugging Face, Autonomous Agents, Prompt Engineering

Frameworks and Web: Next.js, React, FastAPI, Flask, Tailwind CSS, Framer Motion, Node.js, REST APIs

Databases, Cloud and Tools: Supabase, SQLite, MongoDB, MySQL, Vercel, Docker, Git, GitHub, Postman
